

# COVID-19 Drive-Through IT Details

## NOTICE

The COVID-19 community-based testing program is a federally supported, state-directed program in collaboration with Verily's Project Baseline.

The testing guide below has been developed to align with guidelines provided by federal and state public health authorities. Parties adopting this guide should work with their clinical operations, environmental health and safety teams, and their state and local authorities to ensure compliance with relevant laws.

## DISCLAIMER

- This guide is provided in an effort to assist agencies in establishing "drive-through" COVID-19 sample collection and testing operations. However, each agency's needs or circumstances may differ from the assumptions behind the practices described in this guide, so we cannot and do not make any warranties or representations about them or anything else in this guide.
- The situation surrounding COVID-19 is evolving almost daily. Verily has endeavored to accurately describe information that may be helpful in connection with "drive-through" COVID-19 sample collection and testing operations as of the date this guide is made available, but does not have any duty to update this guide and does not take responsibility for any errors or inaccuracies.
- Any action you take upon the information in the guide is strictly at your own risk. Verily disclaims any liability for any losses and damages in connection with the implementation and operation of any aspect of the Project Baseline COVID-19 program. Each user remains responsible for any personnel operating any testing site the user may establish or authorize.
- This guide is not intended to provide medical advice, diagnosis, or treatment or to substitute for the advice of independent medical judgement of physicians or compliance with the then-current recommendations of public health experts, which should be followed in evaluating and implementing the information in this guide. Nothing in this guide should be construed as the giving of advice or the making of a recommendation regarding any decision or action related to the user's health or the health of others.
- Verily does not guarantee any particular results or the health or safety of any health care providers or their patients if the guide is followed. Following this guide does not guarantee coverage and reimbursement.
- Inclusion in the guide does not mean that Verily supports or recommends a specific treatment, drug, device, physician, test, institution or testing site.

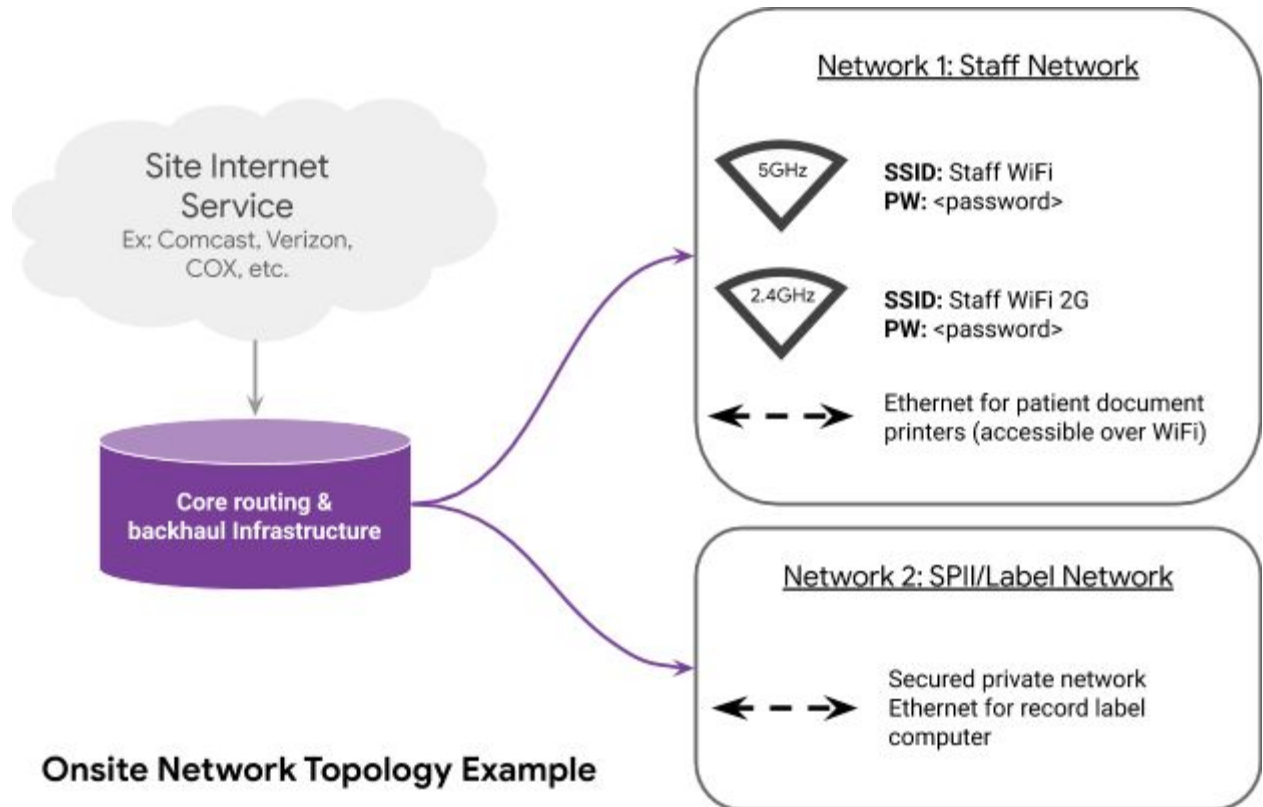

## COVID-19 Drive-Through IT Details

The following provides detailed information about how to plan your network and connectivity needs for the Project Baseline COVID-19 Program.

Specific Deployment Recommendations	
Location	Connectivity Recommendation
<b>Checkpoint 1</b> Kiosk/gate & Appointment confirmation	<ul style="list-style-type: none"> <li>WiFi connectivity to access shared Google Sheet to enter vehicle information</li> <li>Mobile hotspot may be used but is not recommended long term especially if mobile device is a security staff's personal device</li> <li>If reliable Internet is not available, use a printed copies of participant lists; this is not ideal as participant lists can fall out of sync quickly</li> </ul>
<b>Checkpoint 2</b> Patient identity verification & Requisition labels	<p>If printing NOT possible (no power, tables, etc. or unable to service location):</p> <ul style="list-style-type: none"> <li>Coordinate for printing station (near staff or work area) to print out appropriate requisition details and/or participant labels as needed</li> </ul> <p>If printing IS possible (secondary option):</p> <ul style="list-style-type: none"> <li>WiFi connectivity needed for computers reprinting any updated participant requisitions and physically affixed to the participant vehicle (rubber band or tape used and added to windshield wiper, side mirror, etc.)</li> <li>Networked printer ideally over Ethernet but WiFi may be used NOTE: some printer models may only be used on 802.11 b/g/n 2.4GHz (see Topology Example below). Consult any OEM online or included manuals for detailed specs and setup instructions</li> <li>USB printing may be used but not practical depending on the total number of admission stations needing to print in a fluid manner</li> </ul>
<b>Sample Station</b> Sampling area within contamination zone	<ul style="list-style-type: none"> <li>No network needs; this space is typically within the highest contamination zone</li> <li>Considered a device-free space to avoid possible contamination</li> </ul>
<b>SPII Printing Area</b> Central SPII printing & labeling station in proximity to sampling area	<p>Sensitive Personal Identifiable Information Printing Computer Details</p> <ul style="list-style-type: none"> <li>Requisitions from the Project Baseline COVID-19 Program tool are printed daily using a computer connected to the label printer</li> <li>Label computer(s) are recommended to be on a separate network from the staff network in the rest of the site. This computer should be connected</li> </ul> <p>Label Printer Details (Brady BPP33 or similar)</p> <ul style="list-style-type: none"> <li>Direct USB printing should be used only by the Patient Records Print Computer</li> </ul> <p>Document Printer Details</p> <ul style="list-style-type: none"> <li>Direct USB printing should be used only by the Patient Records Print Computer</li> </ul>

## COVID-19 Drive-Through IT Details

<p><b>Command Center/ General Work Areas</b> In proximity to supplies and staff area</p>	<ul style="list-style-type: none"> <li>• General WiFi connectivity for any site leads and staff for ongoing communications &amp; productivity needs. Recommend 10Mbps connection, minimum.</li> <li>• WiFi connectivity is needed for any network printers which cannot accept Ethernet</li> <li>• USB printing may be used but not practical depending on the total number of admission stations needing to print in a fluid manner</li> </ul>
--	---

If you're not sure how to accomplish this, the Baseline COVID-19 Program recommends finding a local deployment vendor to assist and provide connectivity, printer, and general technical support. If you have software specific questions, please contact your Project Baseline point of contact.
