

Guiding your kids to quality content

Parents tell us that it's really difficult to find quality content when they let their kids explore tech on their own. We want to take the mystery out of finding quality videos, apps, games, and books that are right for your family.

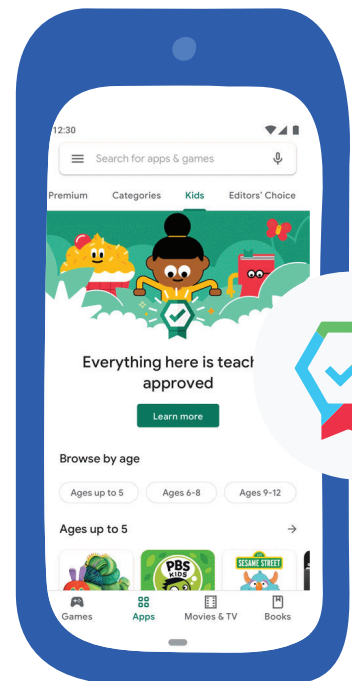

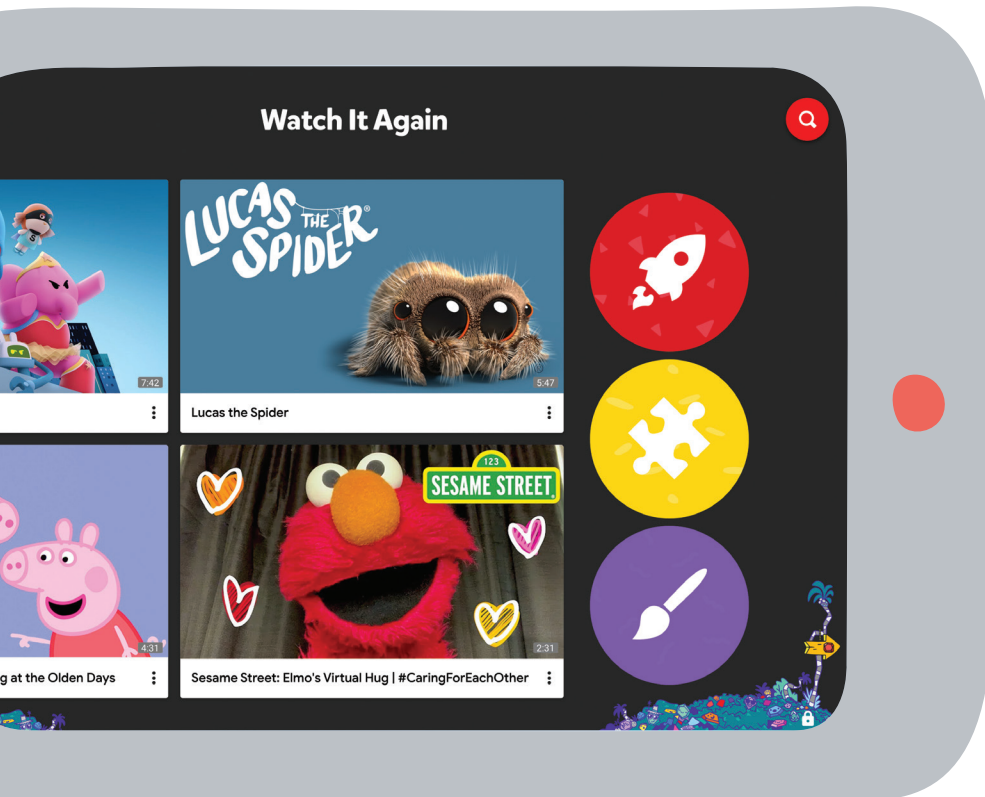

YouTube Kids

YouTube Kids was created to give kids a more contained environment for watching videos that is simpler and more fun for them to explore on their own. It also makes it easier for you to guide their journey as they discover new and exciting interests along the way.

We work hard to keep the videos on YouTube Kids family-friendly using a mix of human review, automated filters, and feedback from parents to protect our youngest viewers. Our library is filled with family-friendly videos on all different topics, igniting your kids' inner creativity and playfulness. It's everything from their favorite shows and music to learning how to build a model volcano.

Teacher approved apps

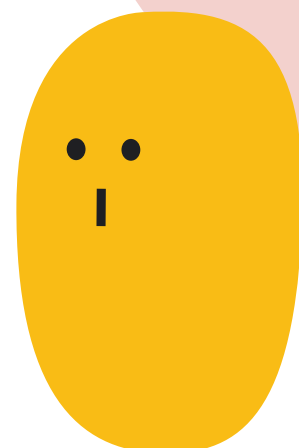

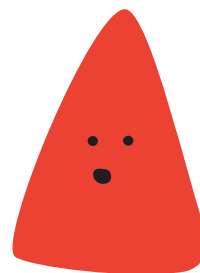

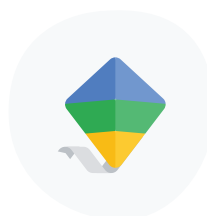

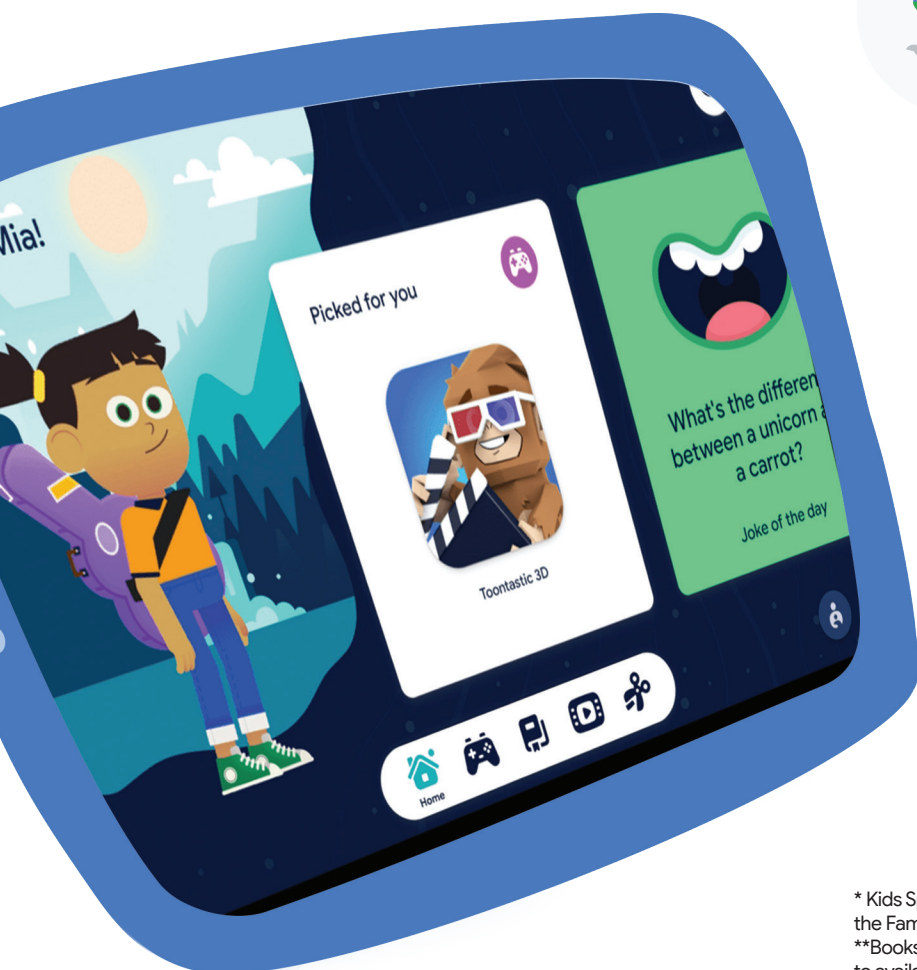

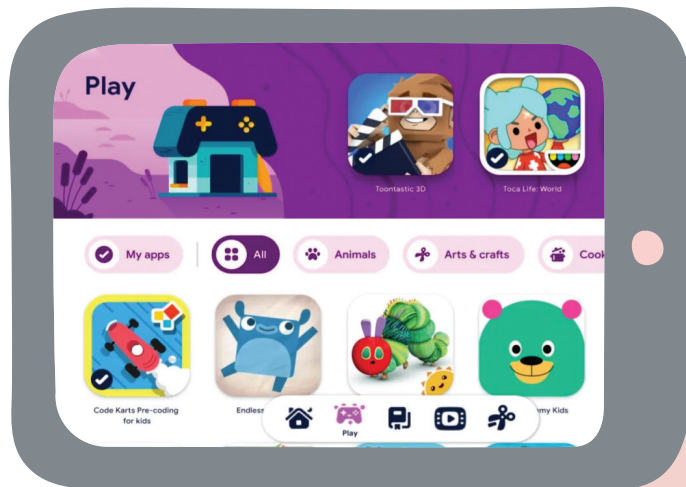

Great content for kids can take many forms: Does it spark curiosity? Does it help your child learn? Is it just plain fun? To share the best apps for kids on the Play Store, we've teamed up with academic experts and teachers across the country to review and rate apps for quality. You can find teacher approved apps in the Kids tab, and look for the "Teacher approved" badge to quickly see which apps have been reviewed and rated highly by teachers.

Kids Space

Kids Space is a tablet experience on compatible devices where kids will see a library of content that can help them discover, create, and grow.* It has teacher-approved apps, handpicked books, and videos that help spark offline play.** Kids Space recommends quality content for your kid based on interests they choose, so they can explore their latest fascinations in engaging ways. From animals to art projects, kids become little experts on the things they love. Kids can even customize their experience by creating their own character.

Plus, you can guide your child's experience by managing content, setting screen time limits, and more, all from your own device in the Family Link app from Google.

* Kids Space requires a Google Account for your child. Parental controls require the Family Link app on a supported Android, Chromebook, or iOS device.

**Books and video content not available in all regions. Video content subject to availability of YouTube Kids app. Books content requires the Play Books app. Availability of apps, books, and video content may change without notice.
