

## COVID-19 Supply Forecast Calculator

### NOTICE

The COVID-19 community-based testing program is a federally supported, state-directed program in collaboration with Verily's Project Baseline.

The testing guide below has been developed to align with guidelines provided by federal and state public health authorities. Parties adopting this guide should work with their clinical operations, environmental health and safety teams, and their state and local authorities to ensure compliance with relevant laws.

### DISCLAIMER

- This guide is provided in an effort to assist agencies in establishing "drive-through" COVID-19 sample collection and testing operations. However, each agency's needs or circumstances may differ from the assumptions behind the practices described in this guide, so we cannot and do not make any warranties or representations about them or anything else in this guide.
- The situation surrounding COVID-19 is evolving almost daily. Verily has endeavored to accurately describe information that may be helpful in connection with "drive-through" COVID-19 sample collection and testing operations as of the date this guide is made available, but does not have any duty to update this guide and does not take responsibility for any errors or inaccuracies.
- Any action you take upon the information in the guide is strictly at your own risk. Verily disclaims any liability for any losses and damages in connection with the implementation and operation of any aspect of the Project Baseline COVID-19 program. Each user remains responsible for any personnel operating any testing site the user may establish or authorize.
- This guide is not intended to provide medical advice, diagnosis, or treatment or to substitute for the advice of independent medical judgement of physicians or compliance with the then-current recommendations of public health experts, which should be followed in evaluating and implementing the information in this guide. Nothing in this guide should be construed as the giving of advice or the making of a recommendation regarding any decision or action related to the user's health or the health of others.
- Verily does not guarantee any particular results or the health or safety of any health care providers or their patients if the guide is followed. Following this guide does not guarantee coverage and reimbursement.
- Inclusion in the guide does not mean that Verily supports or recommends a specific treatment, drug, device, physician, test, institution or testing site.
