

Channel Management Access

Please note that temporary channel management access is required for each YTO production with YouTube. The YTO Media Operations team will upload, set up and launch final YTO content on your YouTube channel and will need temporary access as channel managers to perform tasks in order to begin the process. The YTO Media Operations team will reach out to the relevant channel managers to gain temporary access. The team will need access at least 3 weeks in advance of the launch date. They will only be handling the YTO specific content and will not touch anything else in the channel.
